Exceptional Results

Our Company

Manufacturer of Equipment for Process Industries

Eriez, a privately held company, is a world leader in the design and manufacture of separation, material handling and inspection equipment used throughout process industries like food, plastics and chemicals, mining, aggregates, metalworking and recycling.

Separation equipment often uses magnetics to remove unwanted tramp metals or metal contaminants in both dry and liquid process flows. Other separation applications involve metalworking fluid recycling as well as flotation technologies and magnetic technologies to concentrate minerals.

Our metal detection systems are designed to safeguard consumer products like foods and pharmaceuticals from metal contaminants and protect valuable downstream processing equipment like crushers from large dangerous tramp metals.

The material handling group comprises feeding, conveying and screening equipment to move dry materials with applications and capacities range from metering ounces of flour to moving tons of coal.

This suspended magnetic separator removes large unwanted metals from a conveyor moving aggregates.

A vibratory feeder meters chocolate candies for final packaging.

An Xtreme® metal detector safeguards cooked hams in the packaging process.

Legacy of Innovation

A Bright Future

A simple permanent magnet installed in a grain mill in 1942 by founder O.F. Merwin began the Eriez legacy. Today, through the Merwin family's stewardship, the company has grown through continuous product innovation and worldwide expansion having half-a-million square feet of manufacturing space and nearly 1,000 employees.

From that simple plate magnet, Eriez has grown by identifying market opportunities and developing equipment solutions to meet customers' needs. Through this market-based approach, we have become the dominant player in our core products.

A look to the future sees strong global demand for raw materials like steel and aluminum, precious metals like gold, silver and copper, as well as for food, pharmaceuticals and chemicals. Even greater yet will be the environmental and economic interest in resource conservation and recycling. Eriez' wide range of equipment and solutions align well with future demand in these global markets.

Many Eriez products use magnetic *technology*.

Eriez' development of Mineral Flotation was bolstered by the 2005 purchase of CPT Industries in Canada.

Acquisitions have also expanded the company's position in fluid recovery and recycling.

Teamwork & Dedication

A Growing Workforce

Long term sustained growth leads to expanding facilities, new operations, acquisitions and a constantly growing and evolving workforce. At Eriez, you find opportunity for personal advancement through training and education, but you won't find any time clocks. Our well-trained teams have the knowledge and authority to make decisions positively affecting quality and customer expectations. True teamwork is a product of trust and respect.

This same dedication to teamwork extends throughout the sales organization. Eriez is devoted to hiring and training the best local sales agencies serving its diverse markets. Representatives are identified and recruited for their expertise in serving specific market segments such as mining, food processing, metalworking or scrap metal recycling. Sales representatives participate in ongoing training and have direct access to Eriez' research Ph.D.s and extensive laboratories for product testing and equipment design.

Corporate Vision

Eriez is a global company of dedicated people providing high quality, innovative products and services.

Mission Statement

Using our fundamental principle, the Golden Rule, as a guide to build a worldwide organization that will give:

our **customers** high-quality products and services at a favorable price commensurate with good service before and after the sale;
our **associates** the best possible job opportunity and work satisfaction; our **suppliers** every opportunity to sell their products and services in an atmosphere of courtesy, trust and fairness;
our **shareholders** a reasonable continuing return on their investment; the **communities** in which we operate the benefit of our socially responsible conduct and support as a good corporate citizen. We will strive to conduct our affairs in such an efficient, capable, and friendly manner that everyone with whom we come in contact will be happy to be associated with us.

Community Commitment

Working Together to Make a Difference

Since 1942, Eriez has been an integral and constructive part of the communities in which we operate. The company and its employees give generously of their financial resources, time and skills to make a difference.

This includes leading projects for groups like Habitat for Humanity and Neighborhood Clean to improve peoples lives. We volunteer for leadership positions on non-profit boards and other community organizations adding professional expertise in management, accounting, marketing and more.

Eriez is dedicated to making a lasting, positive impact on the well-being of the communities where we operate. We believe this approach produces an atmosphere where businesses and communities can work together and prosper.

Global Reach

Strategically Located on Six Continents

With a dozen manufacturing facilities strategically located throughout North and South America, Asia, Europe, Africa and Australia, Eriez is positioned well to serve its major markets. Global engineering teams and focused manufacturing enable the company to remain the leader in product development and process solutions while maintaining a low cost structure.

In recent years, new or expanded manufacturing facilities have increased production capacity by more than 50%. New robotic welders, laser cutting tables, high-efficiency manufacturing cells, proprietary automated assembly systems and global lean initiatives across the company have driven cost out of operations, improved quality and increased overall customer satisfaction.

Company process engineers and scientists have developed close working relationships with customers using Eriez equipment. By working together “in the field”, these teams have continued to develop new and refined solutions leading to outcomes like better material recovery rates.
